Role of Counselling to Facilitate Compliance to the Dots for the Treatment of Tuberculosis

Published On: August 11, 2016 | Pages: 028 - 031

Author(s): Siddiqua Aamir, Nosheen Latif and Anila Basit

Abstract Objectives: The objective of the research was to determine and compare the effectiveness of structured counseling to improve adherence and continuation of directly observed treatment (DOTS). As multi drug resistance (MDR) is common due to default among TB patients, to overcome that counseling can play an important role. ...

Timing and Efficacy of VATS Debridement in the Treatment of Parapneumonic Empyema

Published On: June 30, 2016 | Pages: 016 - 019

Author(s): Henrietta Wilson*, Prashant Mohite, Anne Hall and Vladimir Anikin

Abstract Objectives: Empyema thoracis is a common thoracic disease seen in both developing and developed countries. Despite modern management techniques, this condition is still associated with significant morbidity and mortality. Video assisted thoracoscopic surgery (VATS) has become an established mode of treatment for this condition; however th ...

Asthma, Anxiety and Depression are they walking together? Cross- Sectional Descriptive Study

Published On: March 18, 2016 | Pages: 010 - 015

Author(s): Xavier Flor-Escriche*, Roser Poblet- Cortés, Laia Lamarca-Fornell, Judit Mendez-Gomez, Sílvia Álvarez- Álvarez, Sara-Anna Davies-Daunas and MVictoria Feijoo-Rodriguez

Abstract Background/Objectives : The association between asthma and mental health disorders is well known, both anxiety and depression being the most common ones. The aim is to determine the proportion of anxiety and/or depression in an asthmatic population compared to a non-asthmatic one in a Primary Care centre. Secondary objectives: Assess the association b ...
